FRONTEND DEVELOPER | SUMMARY

I am a Frontend Developer with 4 years of experience developing scalable, high-performance web applications in SaaS, fintech, ERP, and AI-driven solutions. I am adept at building component-driven architectures, improving user engagement, reducing churn, and optimizing platform performance for ARR growth. I have experience with React, TypeScript, Next.js, and state management. I am passionate about data-driven development, design systems, and engineering best practices to drive impactful user experiences.

KEY COMPETENCIES

Typescript	Redux	Jest, Cypress, Storybook
Next.js	React Query	Proactive and self-motivated
React	HTML, CSS (Scss, TailwindCSS)	Exceptional troubleshooting skills

PROFESSIONAL EXPERIENCE

Jyve | San Francisco, US | Fully Remote

May 2024 - Apr 2025

Frontend Developer

Jyve Partner Platform (B2B Job Management System)

- Developed a scalable job template creation tool, reducing job setup time and increasing partner adoption.
- Enhanced dashboard insights, allowing stakeholders to track job performance more effectively

Central (Aisle Merchandise Solution).

- Built an AI-powered job quality checker, automating validation and reducing human intervention.
- Improved job approval efficiency, ensuring higher job accuracy with minimal manual oversight.

AFEX Commodities Exchange | Abuja, NG | Hybrid

Sep 2022 - Present

Frontend Developer

- BankX (Neo Bank) – Optimized user onboarding flow, reducing drop-off rates and increasing account activation.
- Workbench (ERP System for Farmers & Logistics) – Built loan and logistics management workflows, enhancing operational efficiency and user adoption
- PayX (Cross-Border Payment Processor) – Improved payment processing speed and security, ensuring compliance with international standards.
- Cuddie (Wallet System) – Implemented real-time transaction validation, reducing failures and increasing user trust.
